

The new EVY Compact Vacuum Cleaner

## FRESH THINKING, SMART CLEANING

### Vacuum only

No use of brushes that will cause dust clouds

~25% material on floor is <math> < 20 \mu\text{m}</math>, that will form dust clouds when agitated by brushes.

### Material recovery

Capturing valuable material to re-utilise

Potential of ~330.000,- \$ Alumina recovery. Equals ~165T additional Aluminium production.

### Ultra fine filtration

Capturing harmful fine dust present in large amounts

99,9% filtration of 0,2-2  $\mu\text{m}$  material & larger, continuous filter cleaning (45m<sup>2</sup>).

### Extending lifetime

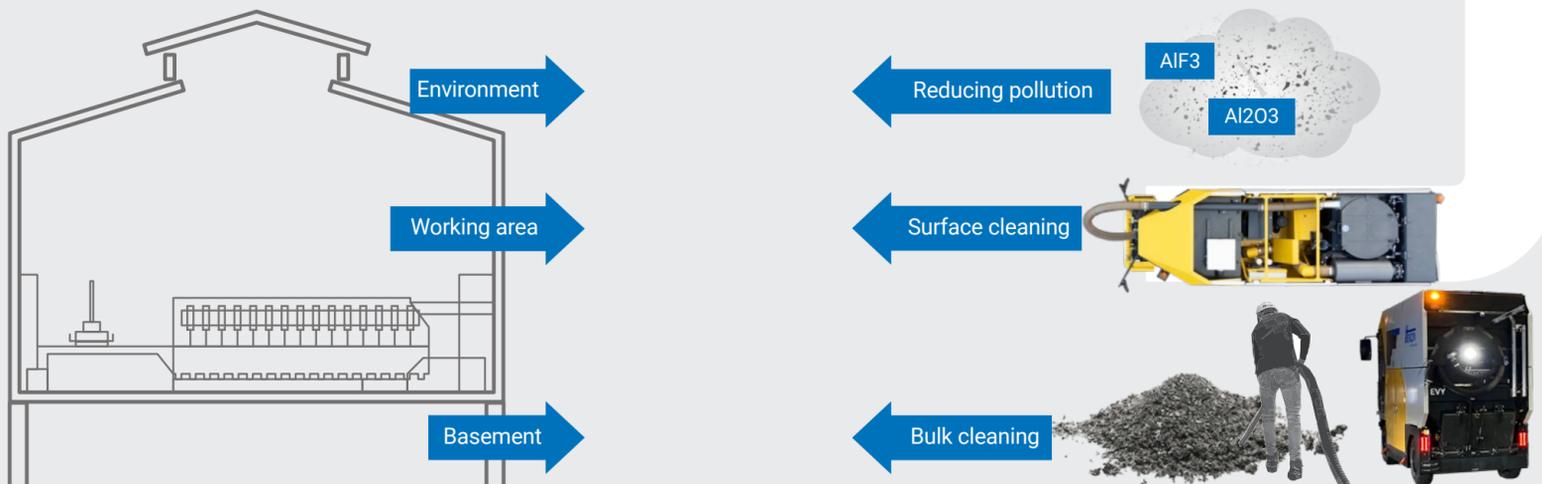

Evacuating fine dust that reduces lifetime on all stationary & mobile equipment

Abrasive material acts as sandpaper. Reducing dust decreases overall maintenance costs.

## Environment

Reducing measurable pollution in & around the plant

Captured material reduces measured pollution.
